+216 24 246 962

Kerkennah, Sfax, Tunisia

SKILLS

FRONTEND: NextJS – ReactJS – GatsbyJS – TailwindCSS

DATABASES: MongoDB – MySQL

BACKEND: ExpressJS – Socket.IO

DEPLOYMENT: NGINX – OpenLiteSpeed

EDUCATION

Software engineering

Higher Institute of Computer Science and Multimedia of Sfax (ISIMS)

September 2021 - June 2026

EXPERIENCE

Web developer intern, ONRTECH

June 2025 - August 2025

AI-powered calls app

- Built an analytics dashboard to visualize call data more clearly in the **NextJS** app.
- Added data caching with **SWR** and improved data fetching, which reduced loading time.
- Built a billing and subscription system from scratch using **Stripe**.
- Set up a **Socket.IO** server to handle real-time audio sharing between servers and play it on the frontend.

Web developer intern, SECURAS Technologies

July 2024 - August 2024

Cybershield WAF

- Built a complete authentication system using **ReactJS** and **ExpressJS**.
- Added OAuth login with **Google**, **GitHub** and **LinkedIn**.
- Implemented **2FA** with TOTP, backup codes, SMS, and email.
- Added real-time notifications and online users tracking with **Socket.IO**.

PROJECTS

Web developer, Code Warriors competition (rank: 2nd)

February 2024

Code Warriors, a platform for sharing IT questions, articles, and best practices

warriors.omaratri.com

- Built the website from scratch using **NextJS** (with SSR), **TailwindCSS** and **MySQL**.
- Added OAuth login with Google, Twitter, Facebook, and GitHub via **NextAuth**.
- Implemented a real-time chat feature with **Socket.IO**, including friend requests.
- Added **Markdown** support in questions, and other features for a nice UX.
- Implemented image upload and management across the app, with auto-loading profile image from OAuth.

Freelance web developer, Halal Correct

January 2023 - February 2023

Halal Correct, a management app for the Halal Correct Certifications company

halalcorrect.com

- Rebuilt the website's frontend using **Gatsby** (SSG) and **TailwindCSS** with a pixel-perfect, responsive, and user-friendly design.
- Improved **SEO** and leveraged the potential of static site generation for a blazing-fast website.
