PROFILE

Final-year Software Engineering student with a specialized focus on building and deploying generative AI and machine learning systems. Hands-on experience in developing production-ready RAG pipelines, multi-agent orchestration and backend infrastructure. Seeking a full-time AI Engineer role to apply my skills in deep learning, NLP, and scalable system design to solve complex real-world problems.

PROFESSIONAL EXPERIENCE

- AI Engineer Intern** 06/2025 – 08/2025
Attoflow Consulting
- Architected and implemented an agentic RAG system using LangGraph integrating vector databases ChromaDB and multi-agent orchestration, enabling secure, context-aware retrieval with optimized LLM interactions for reliable responses.
- Part-Time Software Engineer** 01/2024 – 12/2024
AllNet Company
- Built and maintained company websites
 - Developed a customized chatbot utilizing LLaMA 3 LLM and natural language processing techniques.
- Full-Stack Developer Intern** 06/2023 – 08/2023
AllNet Company
- Developed a full-stack newsletter application, integrating frontend and backend components.

EDUCATION

- Software Engineering** 2023 – present
Higher Institute of Computer Science and Multimedia of Sfax (ISIMS)
- Integrated Preparatory Program** 2021 – 2023
Higher Institute of Computer Science and Multimedia of Sfax (ISIMS)
- Baccalaureate in Mathematics** 2021
Ksour Essef High School

CERTIFICATES

- Efficient Large Language Model (LLM) Customization (NVIDIA) ✓
- IBM AI Engineering Professional Certificate ✓
- Building RAG Agents with LLMs (NVIDIA) ✓
- Microsoft Certified: Azure AI Fundamentals ✓
- Generative AI for Software Development ✓

PROJECTS

- Document Chatbot assistant**
- Developed a RAG chatbot for context-aware Q&A on PDFs, using LangChain, HuggingFace API, and FAISS.
- AI-Powered Job Recommendation Web App**
- Built a full-stack platform using embeddings and rule-based filters to deliver personalized, scalable job recommendations.
- Expense Tracker**
- Developed a full-stack web application using ASP.NET Core MVC for tracking income, expenses, and budgets.

SKILLS

- Core AI/ML:** Deep Learning, NLP, LLMs, RAG
- Tools & Frameworks:** PyTorch, TensorFlow, LangChain, LangGraph
- Software Engineering:** OOP, Design Patterns, Problem Solving, Agile/Scrum, REST APIs, Git
- Development Concepts:** Backend Development, Frontend Basics (React, Next.js), Data Handling & Processing

ORGANIZATIONS

- Competitive Programming Club at ISIMS** 2023 – 2025
- Junior Chamber International (JCI) in Ksour Essef** 2022 – 2023
National Theme Advisor

LANGUAGES

Arabic: Native • **French:** Conversational • **English:** B2 (IELTS)
